## PROJECT

**Dangau Studio - Platform Bisnis Seni Digital**                **Juni 2025 - Agustus 2025**
- A platform connecting artists and art enthusiasts, developed using Laravel.
- Key features: artist profiles, online galleries, virtual exhibitions, and art transactions (e-commerce).
- Integrated with Midtrans (payment gateway) and RajaOngkir (shipping cost checker).

**Website Sugar Care**                                                    **Juni 2025 - Juni 2025**

- Developed a website landing page using Next.js to showcase information about the Sugar Care application.
- Key features: Home, About, Features, Advantages, Video, and FAQ sections.

**Website Portal Datindo Entrycom**                           **Maret 2025 - Mei 2025**

- Developed the Datindo Entrycom web portal using Next.js with Swagger API integration.
- Key features: daily reports, monthly reports, and custom report requests.

**Website Databudi**                                          **Februari 2025 - Maret 2025**

- Developed a web application including landing page, login, and dashboard using Next.js, integrating Figma designs and APIs via Axios, with user authentication and responsive design.

**Website Perkampungan Adat Sijunjung**                 **Desember 2024 - Februari 2025**

- Developed a web platform using Laravel to showcase the tourism and cultural attractions of the Sijunjung Traditional Village.
- Key features include: interactive Virtual Tour, local exploration (UMKM products and tour packages), article and news publications, cultural gallery, and online transactions for purchasing UMKM products and tour packages.

**Website Puncak Labuang**                                 **July 2024 - September 2024**

- Managed and developed the Puncak Labuang web project as a Fullstack Developer.
- Key features: Home, About, Events, Articles, plant barcode scannable via mobile app, and APIs for mobile app integration.
- Objective: To provide interactive and user-friendly access to information while supporting integration with the mobile application.

**Website Rumah Singgah M.Ihpan**                            **Mei 2024 - Juli 2024**

- Developed a web platform to provide temporary housing for patients and their families from remote areas, particularly Pasaman Regency, undergoing medical treatment in Padang.
- Key features: accommodation reservation system and donation feature integrated with Midtrans payment gateway to support facility operations.

**Sistem Inventory Jurusan Teknologi Informasi**        **September 2023 - Desember 2023**

- Developed a web application using PHP and MySQL to manage and monitor inventory, including hardware and software assets.
- Key features: login with role-based access, inventory management, stock monitoring, search and filter functionality, and transaction logging.i
