About Me

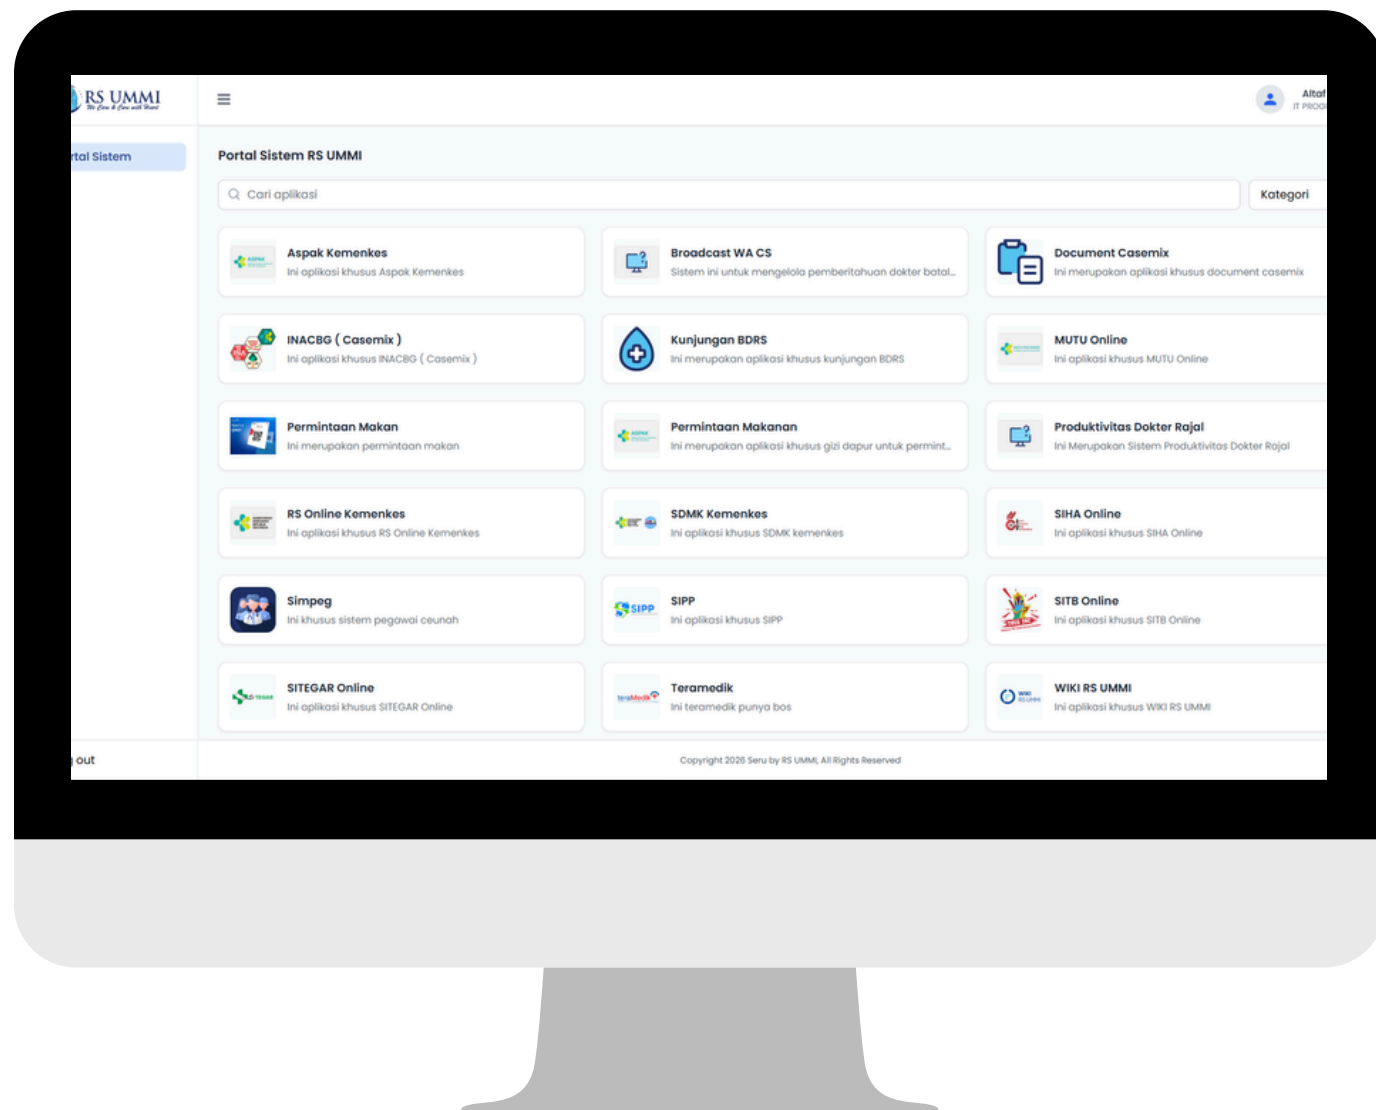

Hello, I'm Altaf Hafizun, a web developer with an Information Technology background from Politeknik Negeri Padang. I specialize in website development, creating functional and user-friendly websites. With a commitment to continuous learning, perseverance, and responsibility, I am ready to contribute to dynamic and innovative projects while further enhancing my skills.

My Recent Project

PROJECT 1

Sistem Single Sign-On (SSO) Rumah Sakit

I developed a centralized Single Sign-On (SSO) system for a hospital to provide secure access across multiple internal applications. Features include unified login, role-based access, and centralized session management.

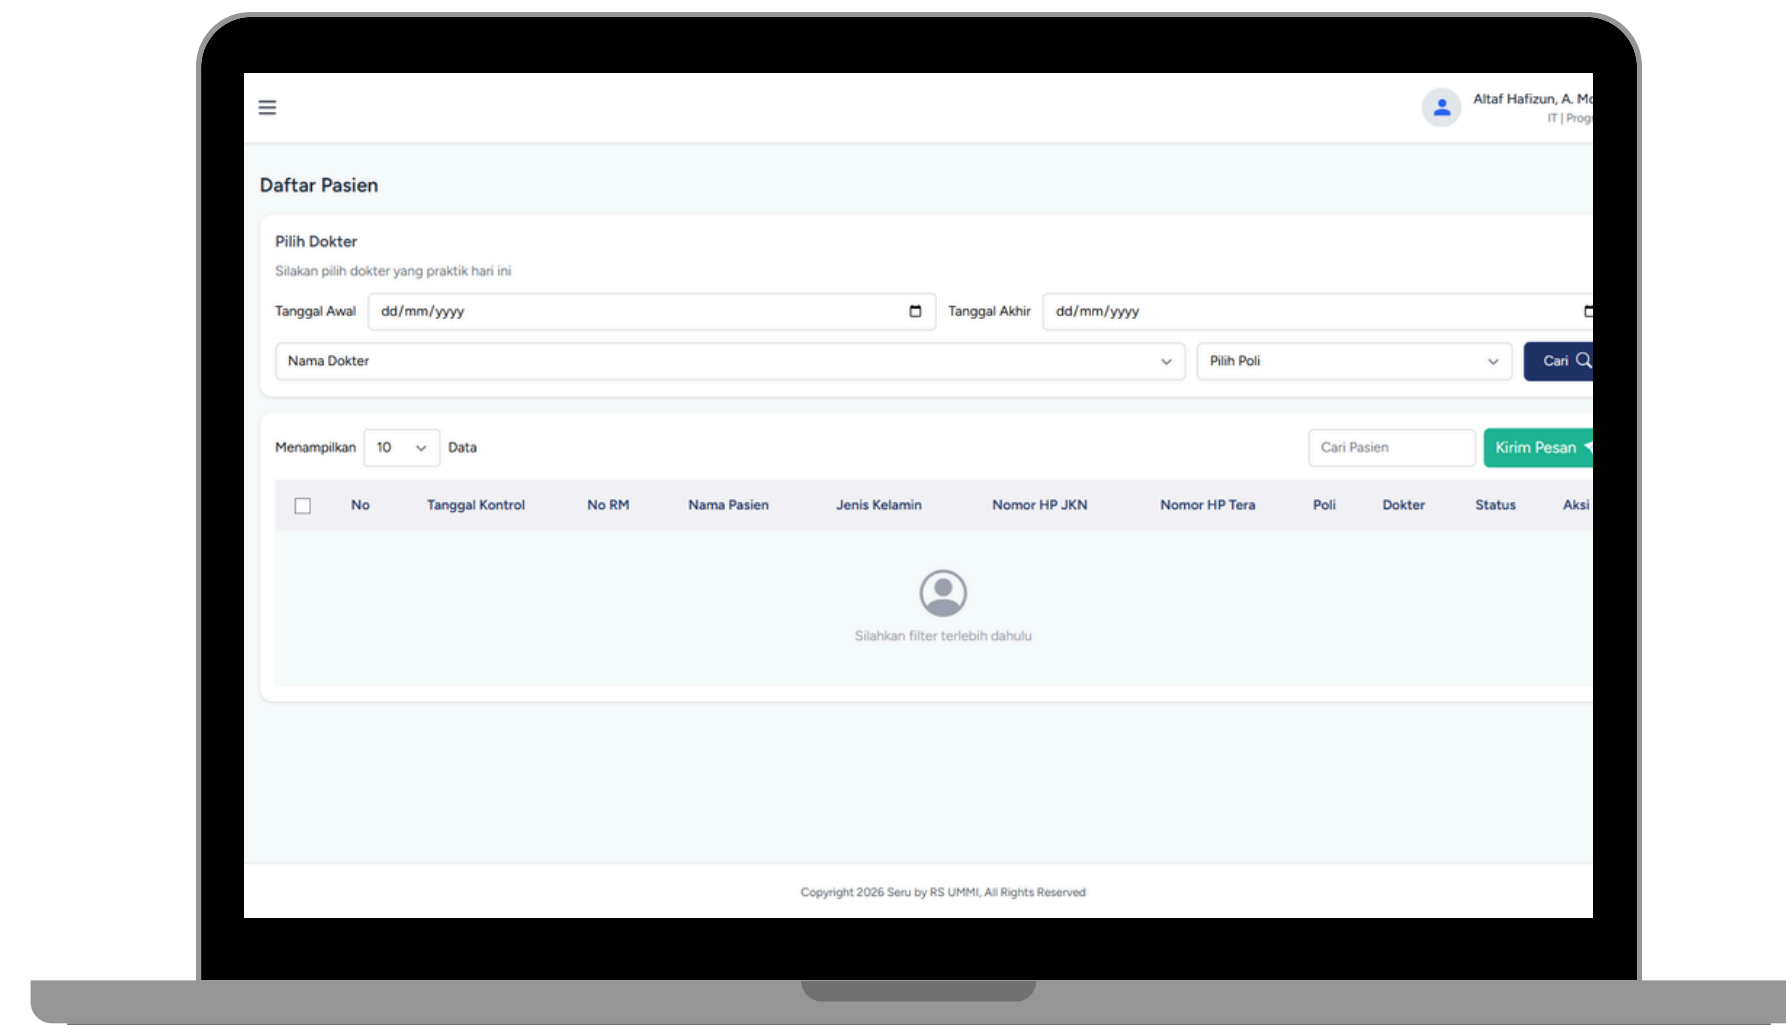

PROJECT 2

Sistem Broadcast Whatsapp Pasien

I developed a web-based system for sending WhatsApp notifications to registered and scheduled patients. Key features include recipient selection based on queue data, message templates, and notification delivery history.

My Recent Project

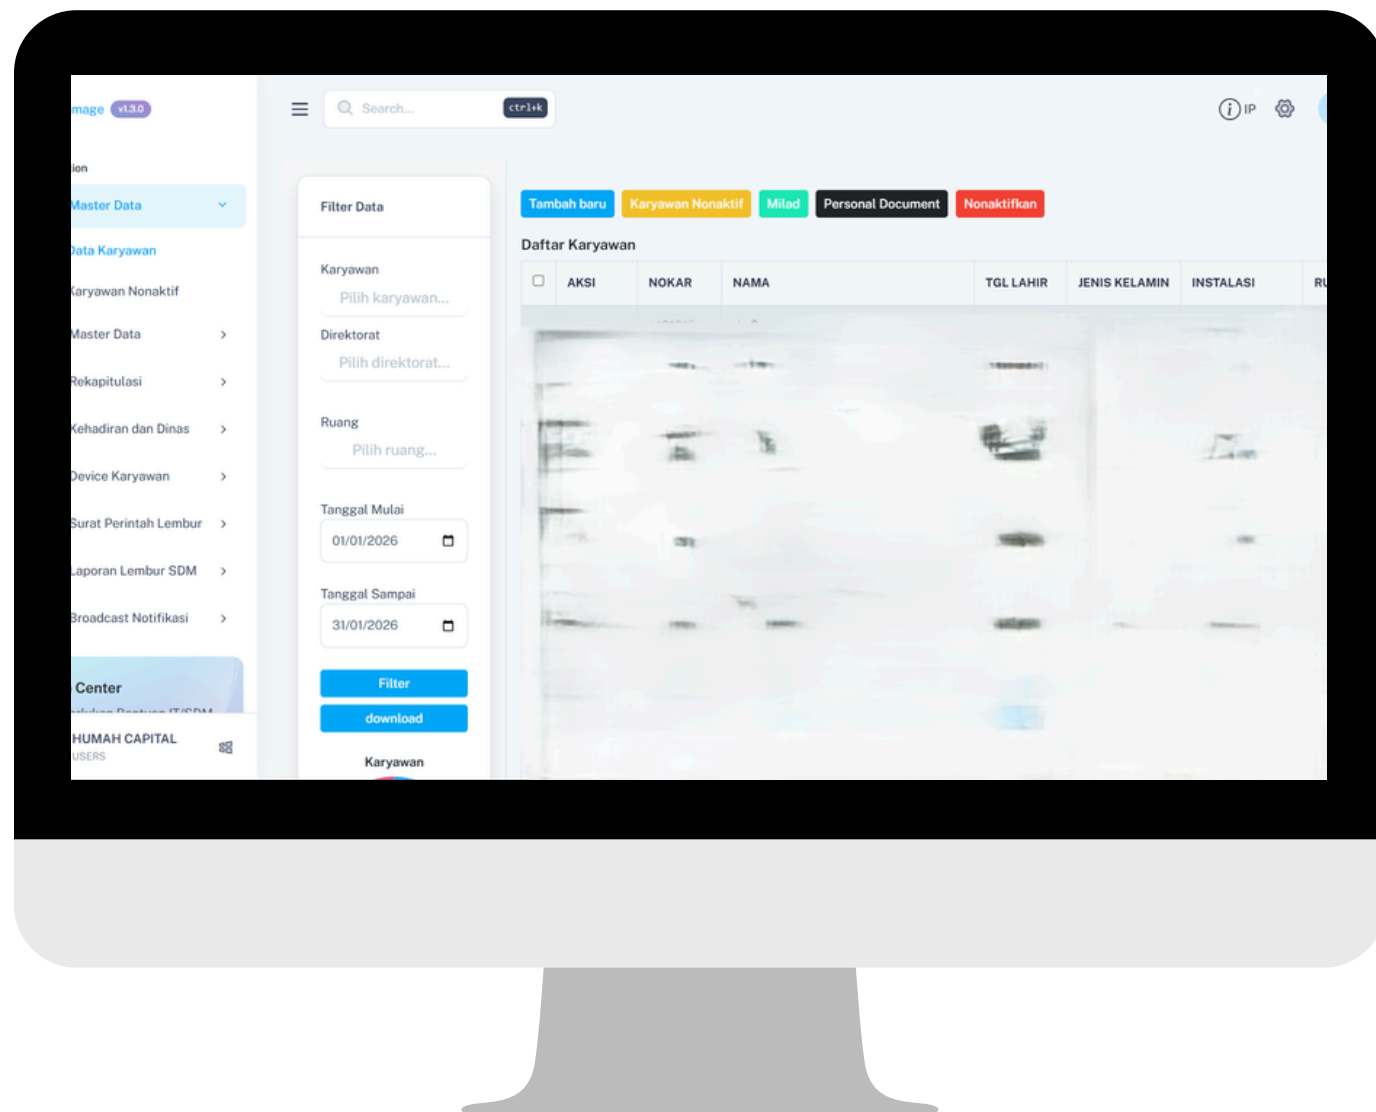

My Recent Project

PROJECT 3

Sistem Kepegawaian (SIMPEG)

I developed and enhanced features in the hospital personnel system, including employee data optimization, export of birthday and personal document data, employee device unlock features, and mobile notification broadcast functionality.

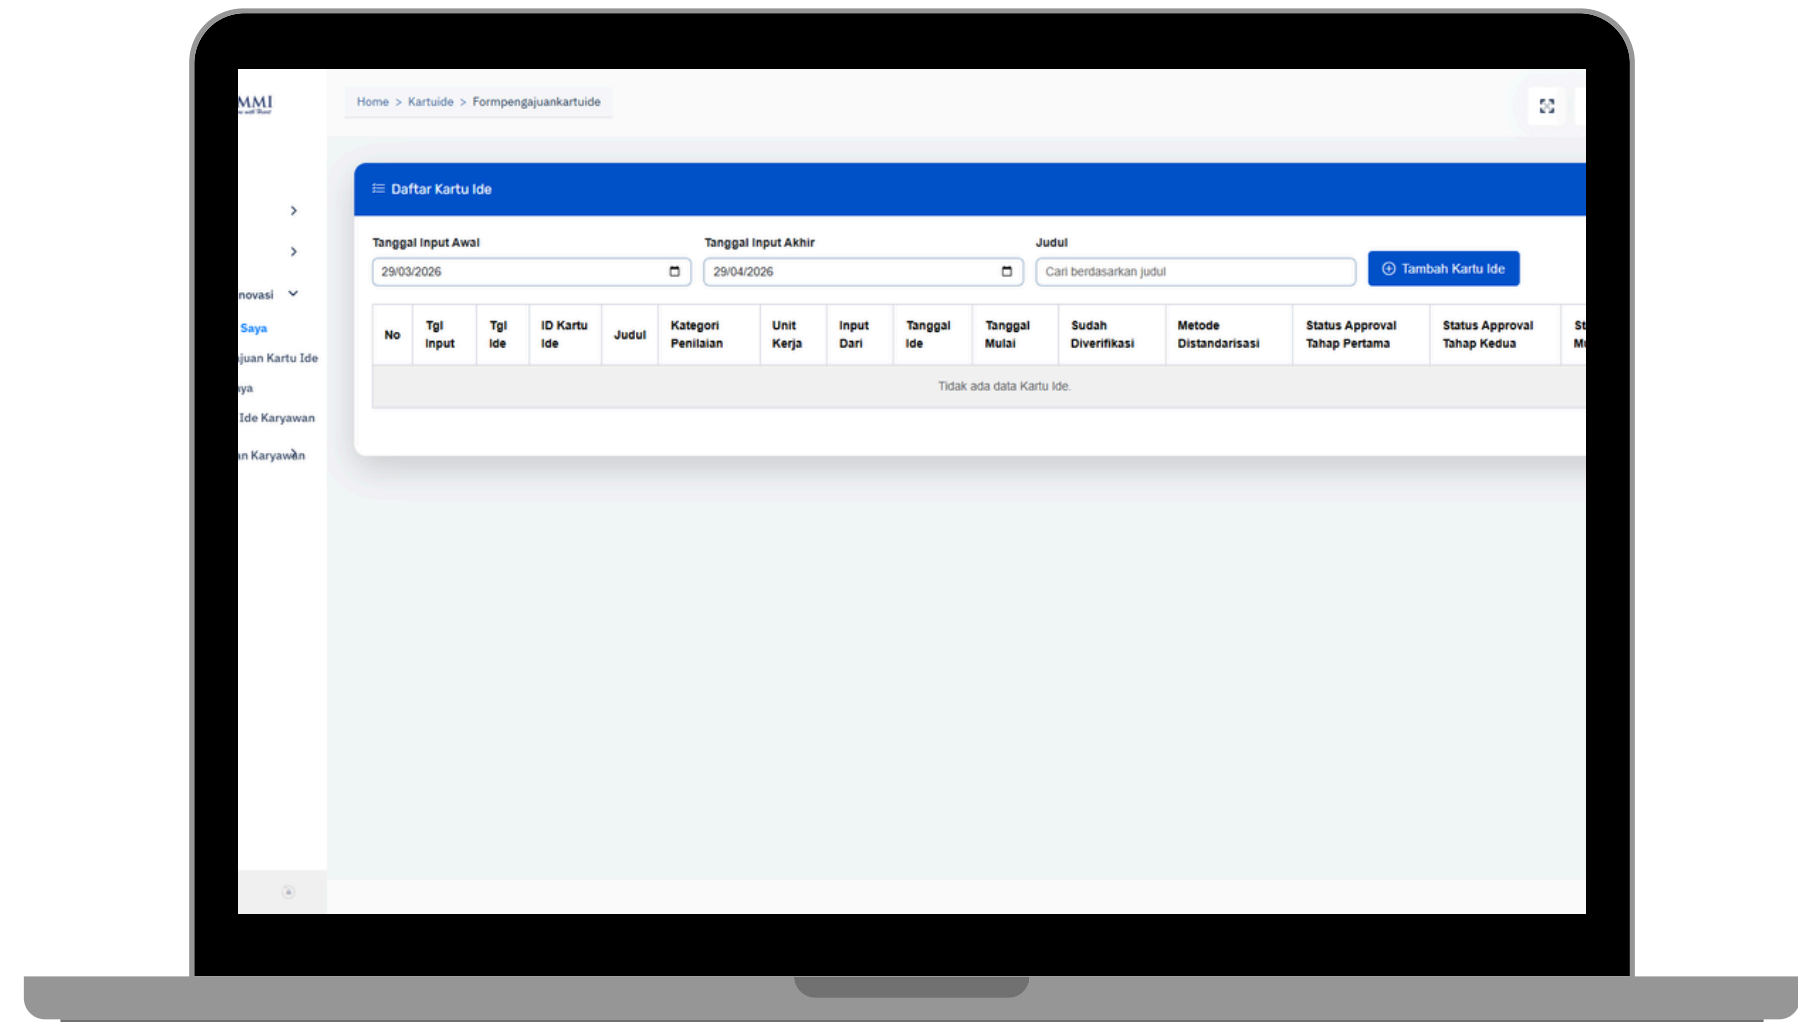

PROJECT 4

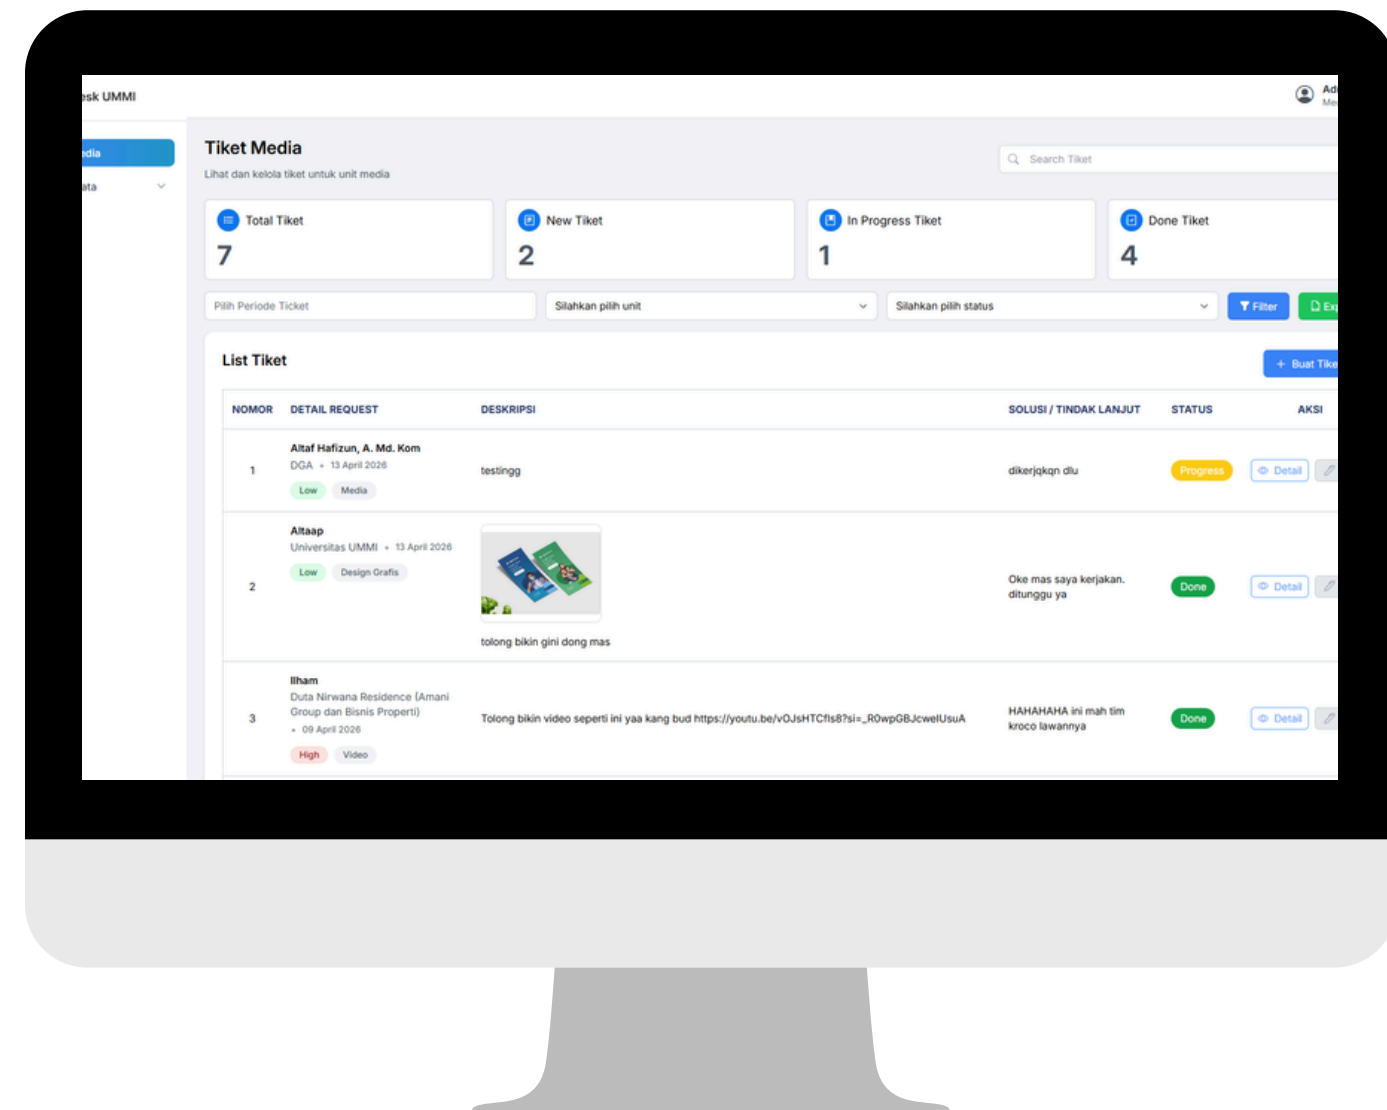

SISTEM APPRAISAL KINERJA UMMI (SAKU)

I developed and enhanced features in the SAKU system, including unit and individual performance evaluations, KPI cutoff and closing with logging, as well as training proposal and idea card modules.

My Recent Project

My Recent Project

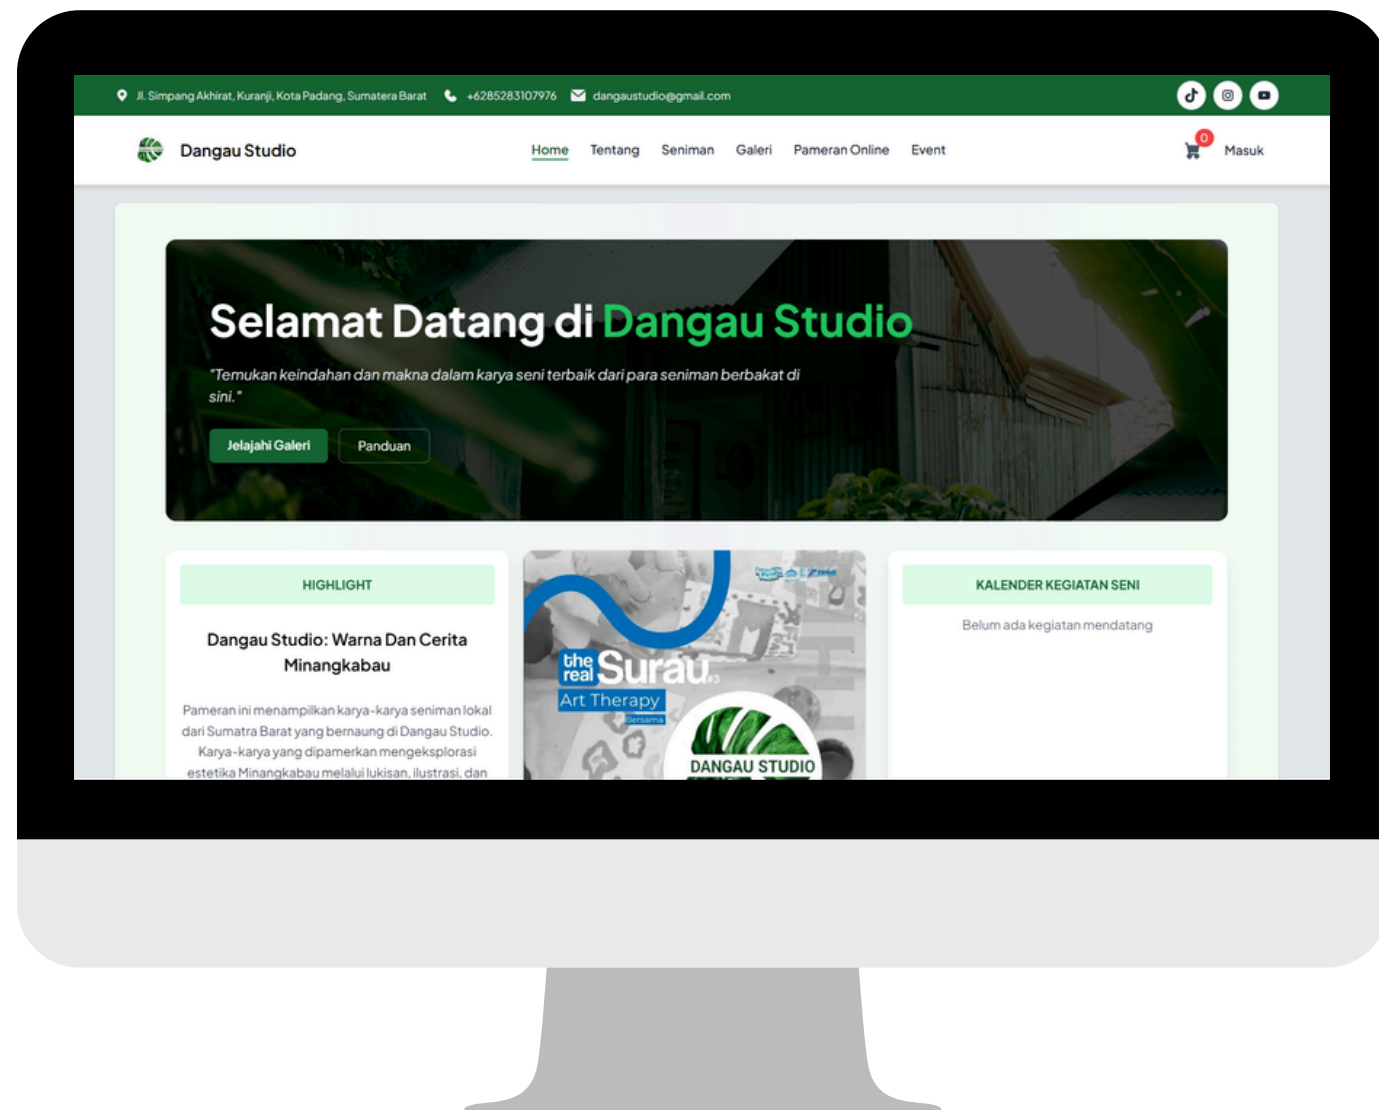

PROJECT 5

Sistem Helpdesk EKSTERNAL Media UMMI

I developed a web-based system for the UMMI Group network to submit work requests related to graphic design and videography to the Multimedia Unit.

My Recent Project

PROJECT 6

Dangau Studio – Platform Bisnis Seni Digital

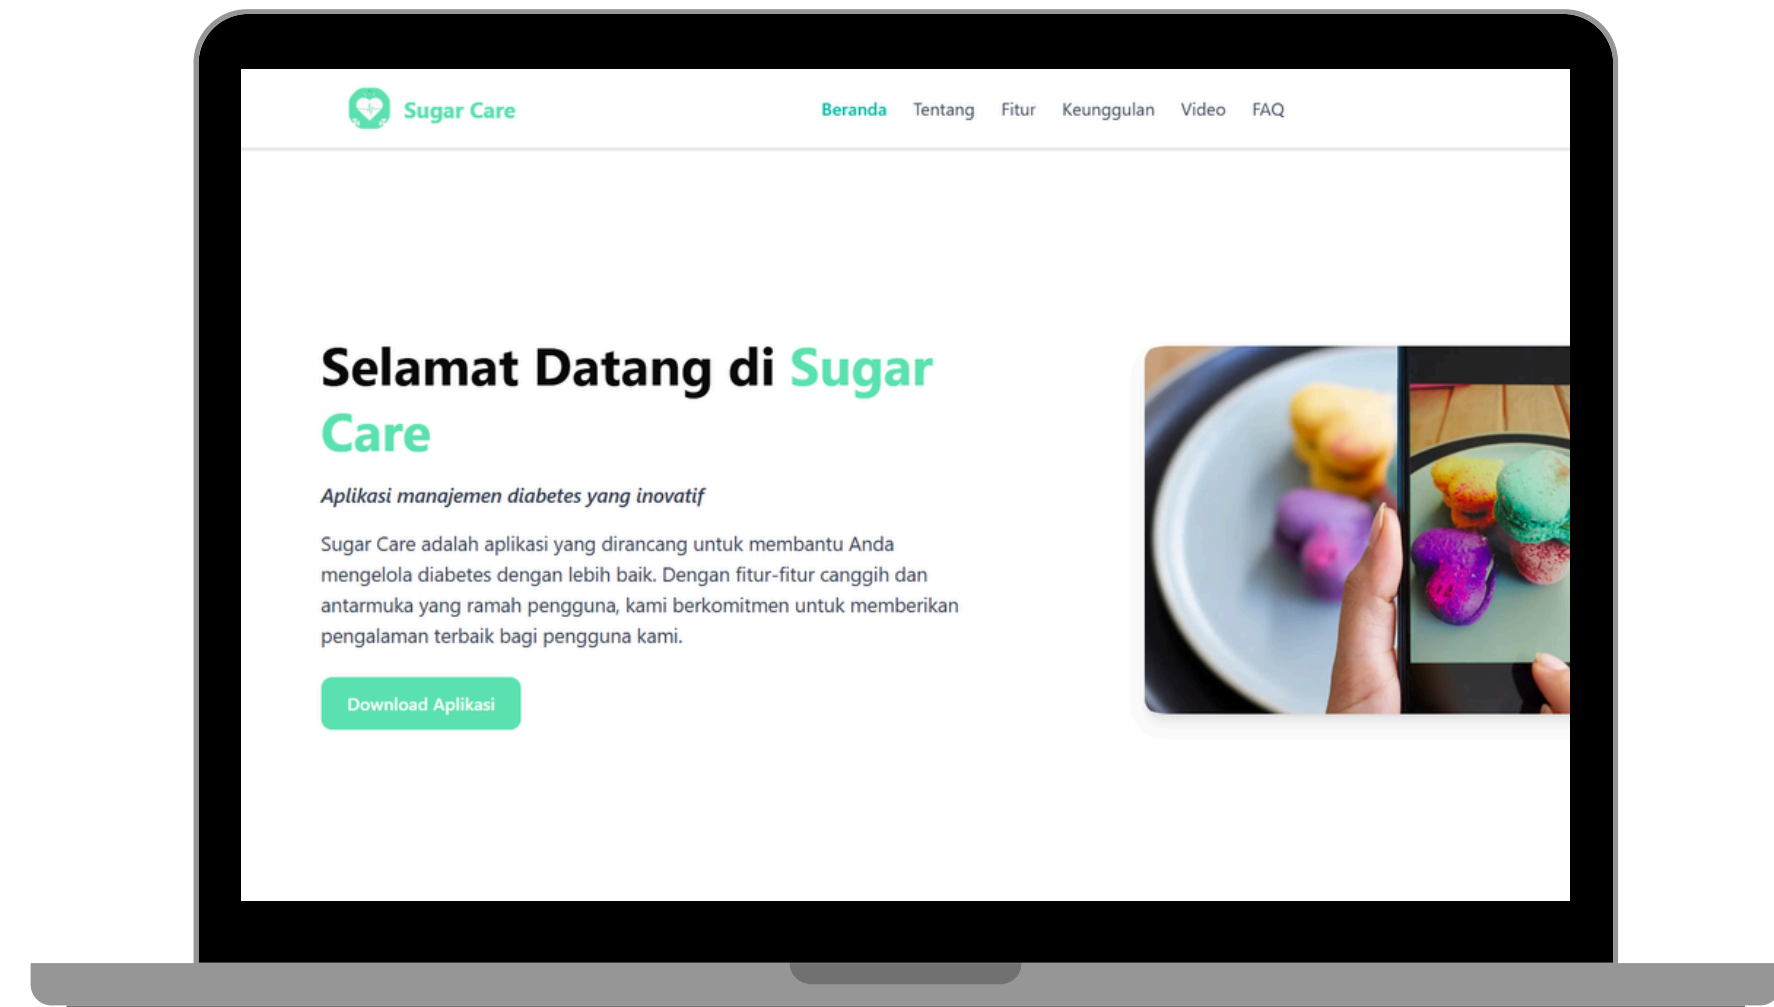

I developed a platform that connects artists with art enthusiasts using Laravel. The main features include artist profiles, online galleries, online exhibitions, and e-commerce transactions. It is integrated with Midtrans (payment gateway) and RajaOngkir (shipping cost API).

PROJECT 7

Website Sugar Care

I developed a landing page using Next.js to showcase information about the Sugar Care application. Key features include Home, About, Features, Advantages, Video, and FAQ.

My Recent Project

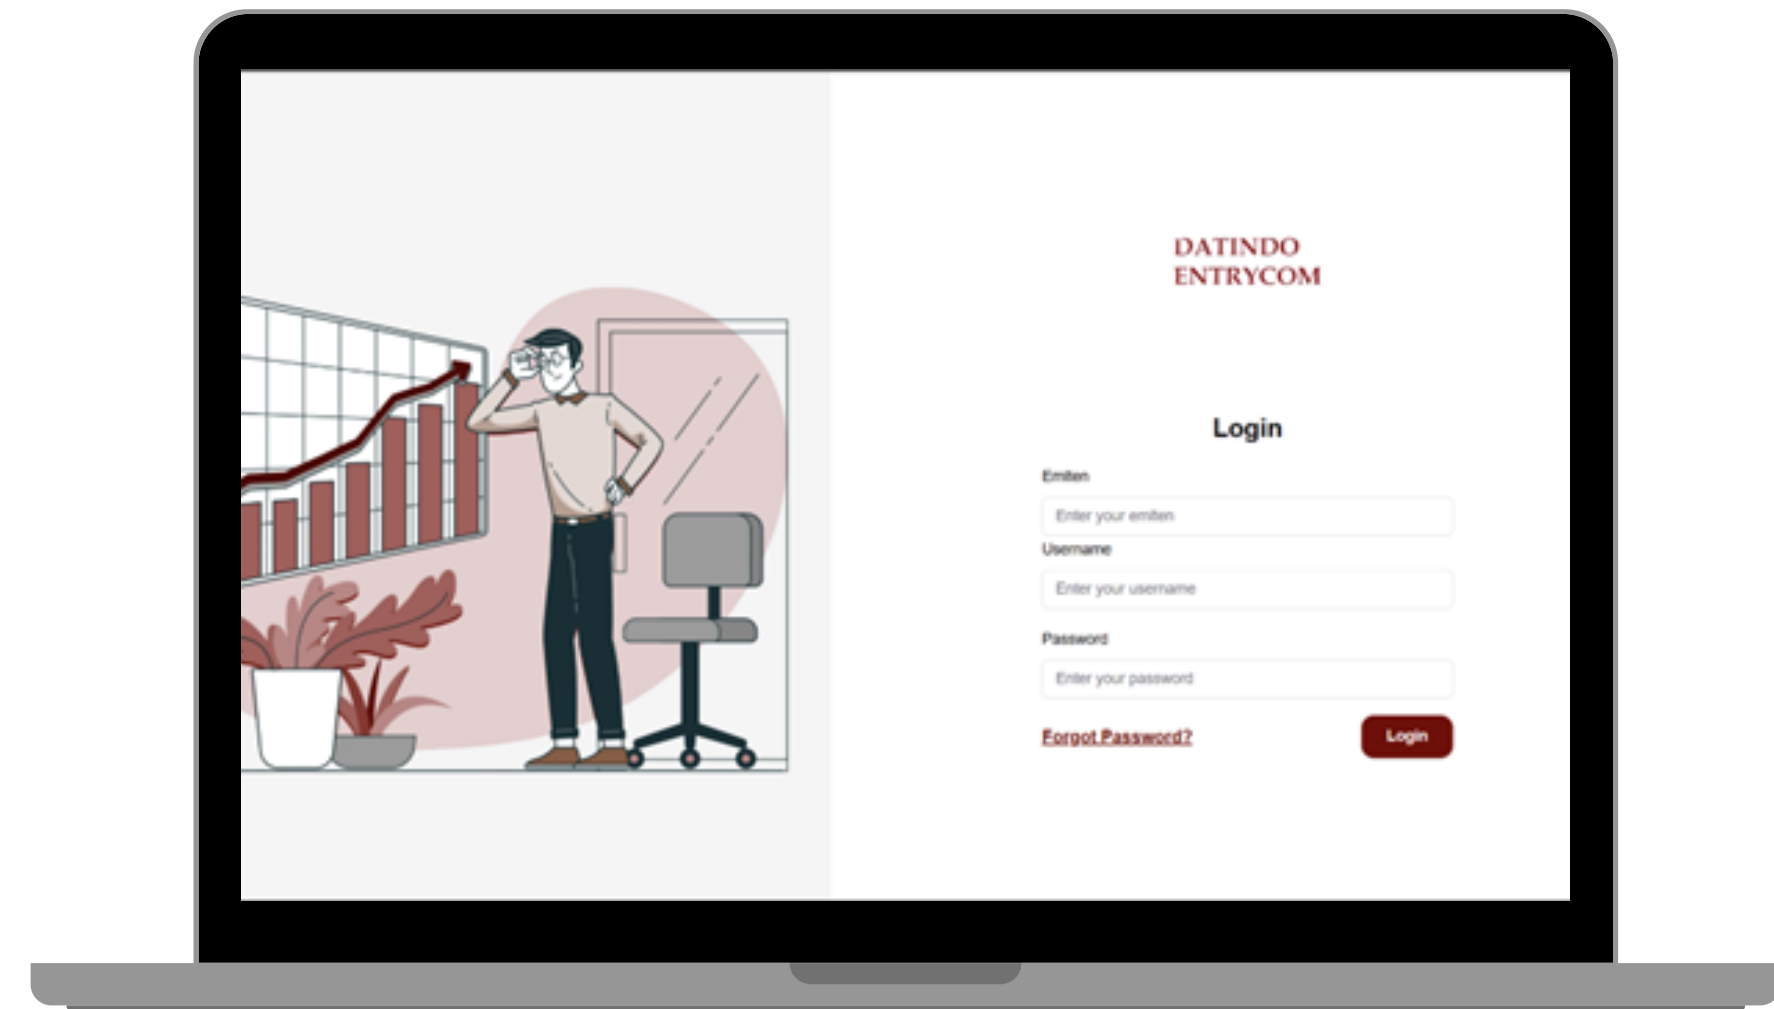

My Recent Project

Website Portal Datindo Entrycom

I developed a portal website for Datindo Entrycom using Next.js, integrated with Swagger API. Key features include daily reports, monthly reports, and report requests.

PROJECT 8

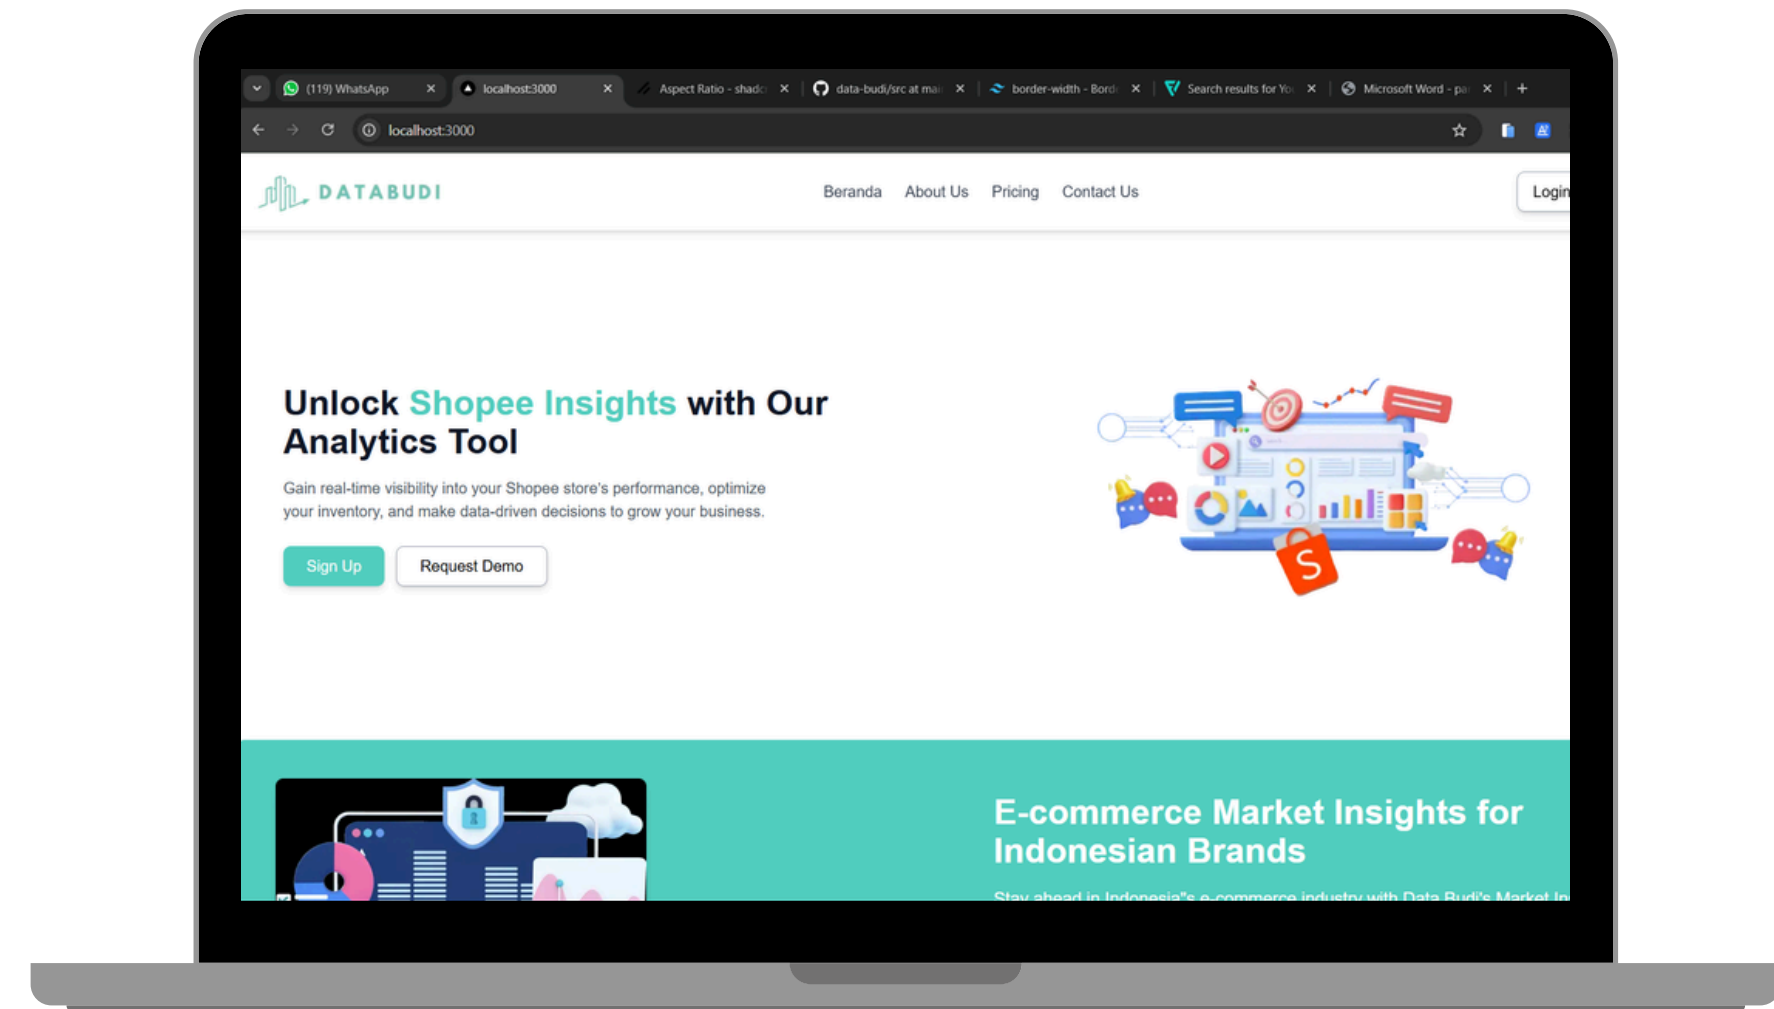

PROJECT 9

Website Databudi

I developed a web application consisting of a landing page, login, and dashboard using Next.js. Integrated with designs from Figma and APIs via Axios, featuring user authentication and responsive design.

My Recent Project

My Recent Project

PROJECT 10

Website Perkampungan Adat Sijunjung

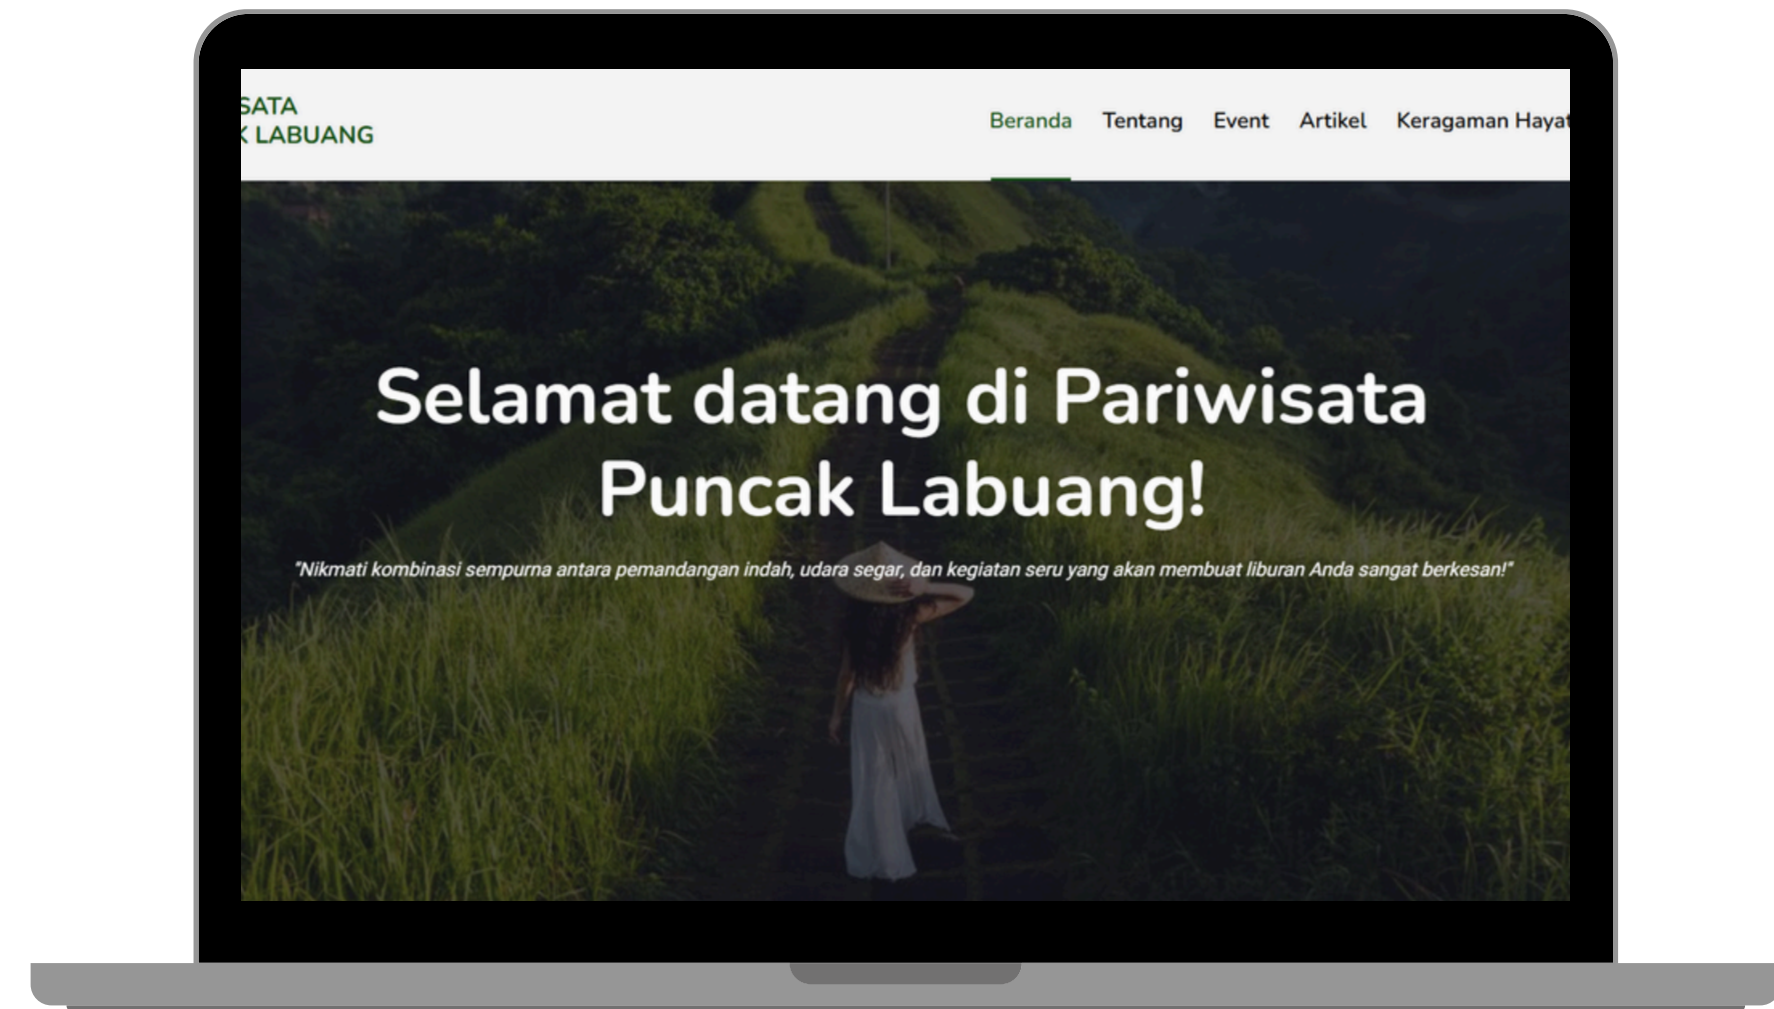

I developed a web platform using Laravel to promote the tourism and cultural heritage of Perkampungan Adat Sijunjung. Key features include an interactive Virtual Tour, local exploration (UMKM products and tour packages), article/news publishing, cultural gallery, and online transactions for purchasing UMKM products and tour packages.

PROJECT 11

Website Puncak Labuang

I managed and developed the Puncak Labuang web project as a Fullstack Developer. Key features include Home, About, Events, Articles, plant barcode scanning via mobile apps, and APIs for mobile app integration.

My Recent Project

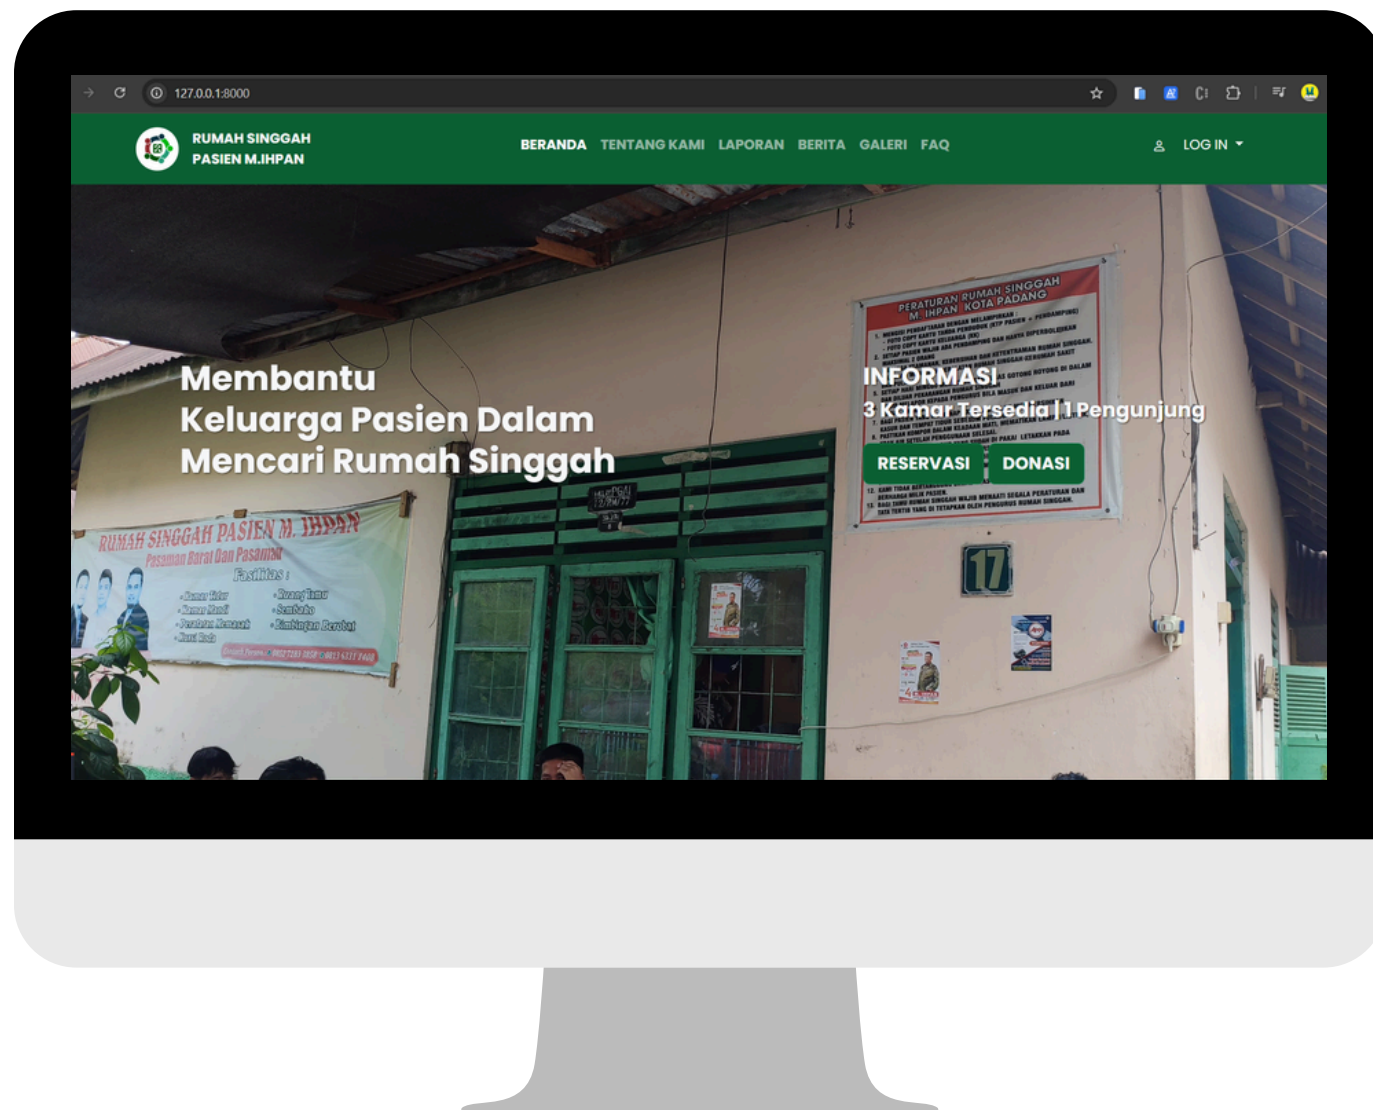

My Recent Project

PROJECT 12

Website Rumah Singgah M.Ihpan

I developed a web platform to provide temporary housing facilities for patients and their families from remote areas, especially Pasaman Regency, undergoing medical treatment in Padang City. Key features include a housing reservation system and a donation feature, integrated with Midtrans as a payment gateway to support facility operations.

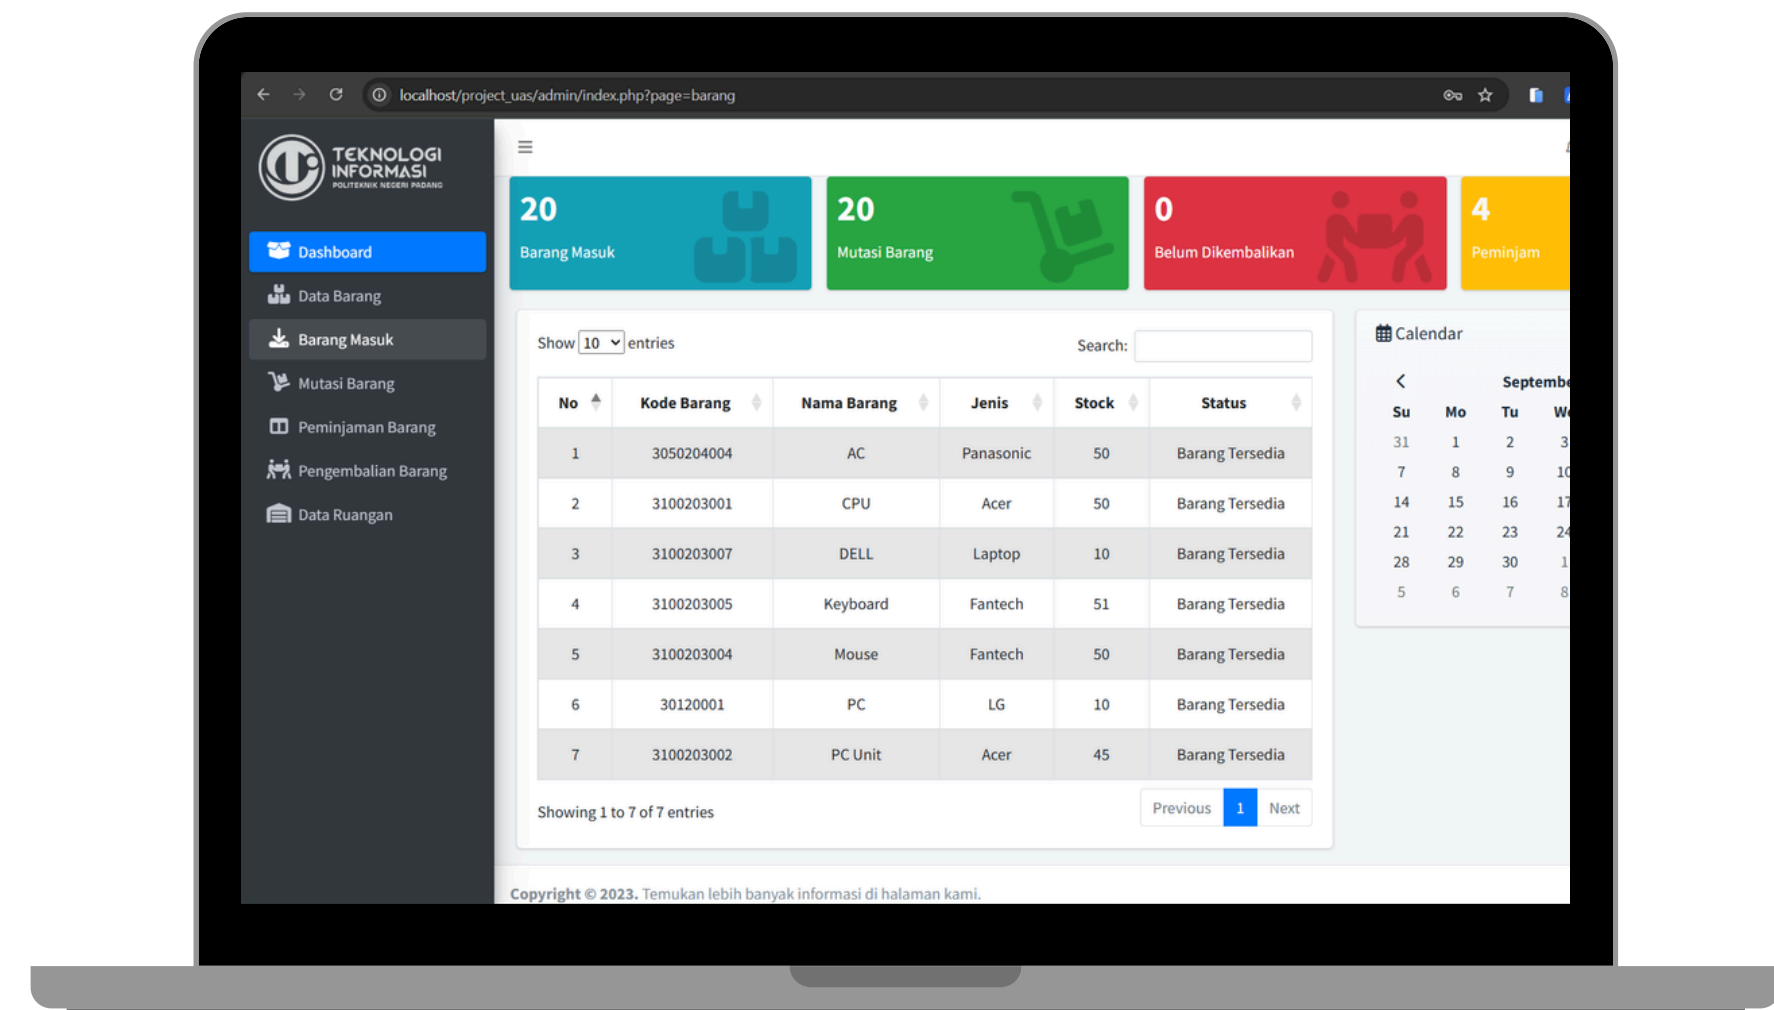

PROJECT 13

Sistem Inventory Jurusan Teknologi Informasi

I developed a web application using PHP and MySQL to manage and monitor inventory items, including hardware and software. Key features include multi-level user login, item management, stock monitoring, search and filter, and transaction recording.

My Recent Project

My Recent Certificate

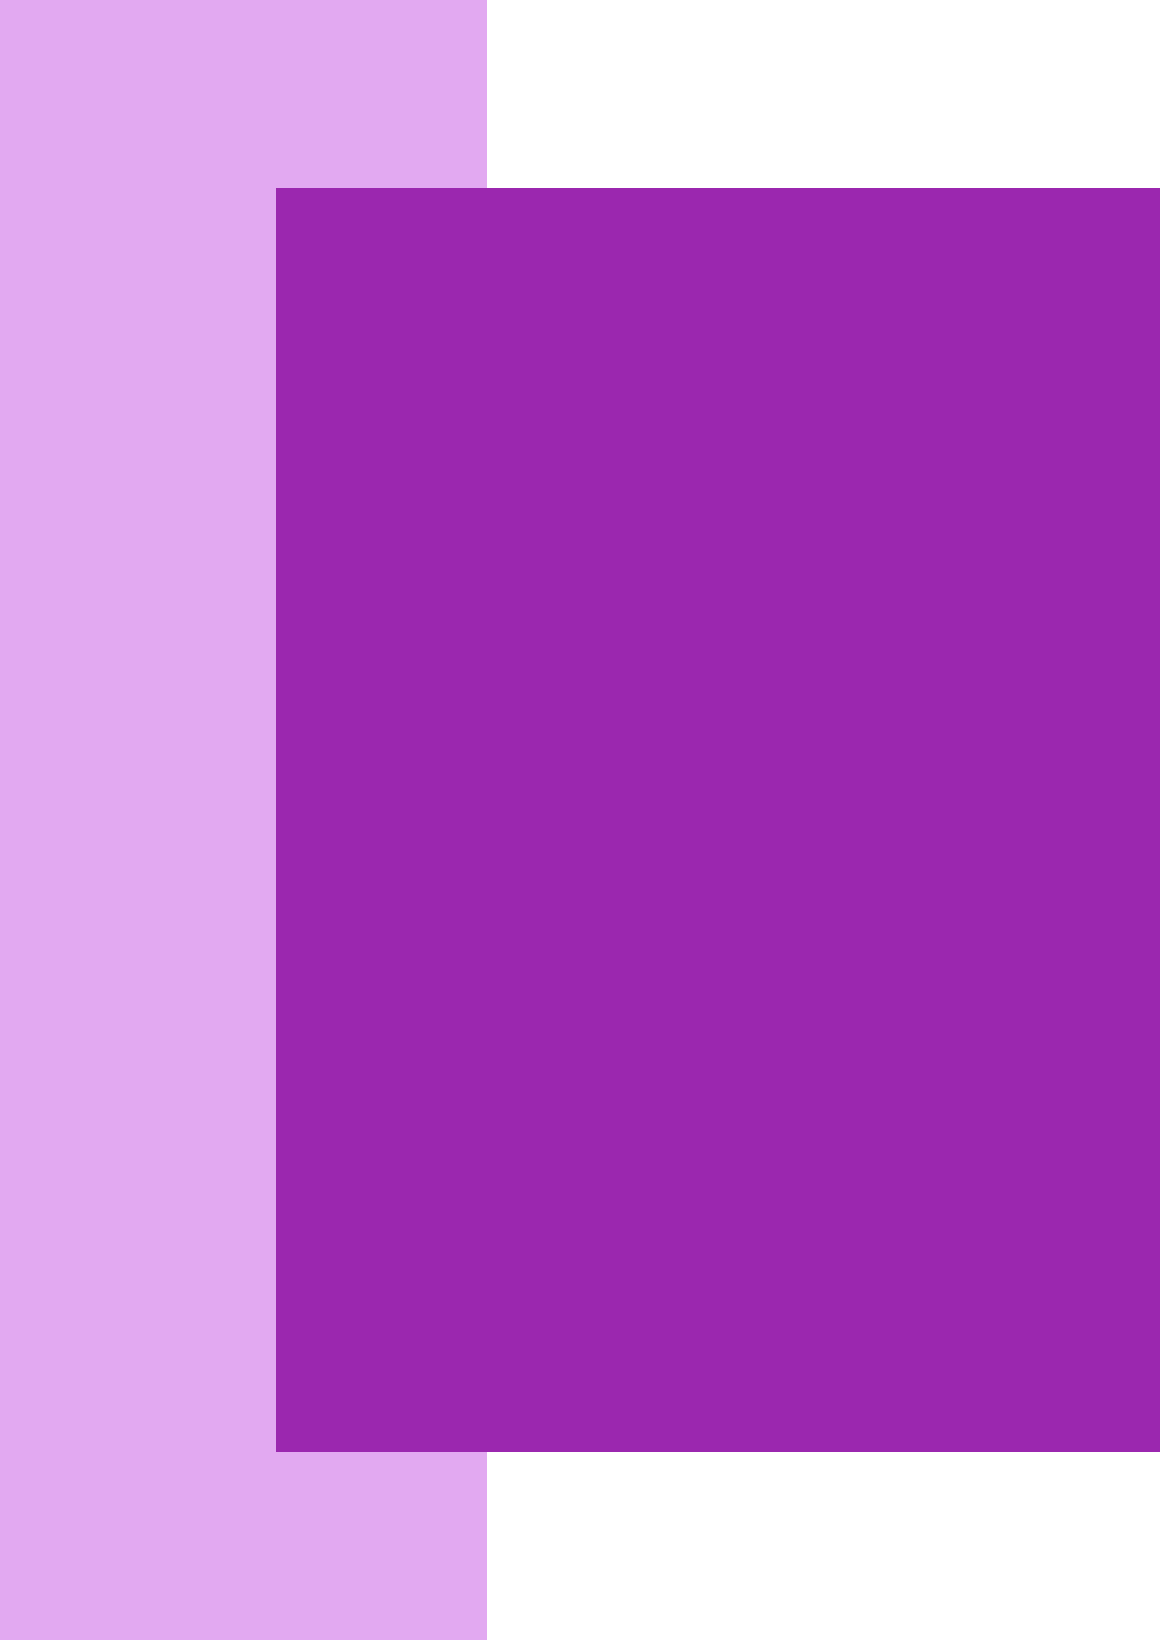

Secured Funding For Vocation Student Creativity Program 2024

My Recent Certificate

**TOP 165 Innovillage 5th 2024
Funding – Jelajahi Pesona Rumah
Gadang di Perkampungan Adat
Sijunjung Menggunakan Virtual
Tour**

LET'S WORK TOGETHER !

THAT'S MY PORTFOLIO SO FAR.
